Score sheet for the regeneration experiment.

Reduction, but <10% Reduction > 10% Reduction > 20% Reduction	Mouse ID:	Date:				
Based on initial weight [] Based on control group weight [] Uninfluenced or rise 0 Reduction, but <10% 1 Reduction > 10% 2 Reduction > 20% 3 Reduction > 20%		Time:				
Based on initial weight [] Based on control group weight [] Uninfluenced or rise 0 Reduction, but <10% 1 Reduction > 10% 2 Reduction > 20% 3 Reduction > 20%	1. Body Weight	Score				
Based on control group weight [] Uninfluenced or rise Reduction, but <10% Reduction > 20% Reduction solution		l				
Uninfluenced or rise Reduction, but <10% Reduction > 10% Reduction > 20% Reduction > 20% Reduction > 20% Reduction > 3 Reduction > 20% Reduction 20% Reducti						
Reduction > 10% Reduction > 20% Reduction 20	Uninfluenced or rise	0				
Reduction > 20% 2. General condition Shiny eyes, body openings and skin olean Cloudy eyes, increased muscle tone, more visible breathing Eyes sunken dull, sticky body openings, increased breathing Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. Self-injury (e.g. in case of excessive itching)	Reduction, but <10%	1				
2. General condition Shiny eyes, body openings and skin Clean Cloudy eyes, increased muscle tone, more visible breathing Eyes sunken dull, sticky body openings, increased breathing Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive attching)	Reduction > 10%	2				
Shiny eyes, body openings and skin Cloudy eyes, increased muscle tone, more visible breathing Eyes sunken dull, sticky body openings, increased breathing Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. Self-injury (e.g. in case of excessive attching)	Reduction > 20%	3				
Cloudy eyes, increased muscle tone, more visible breathing Eyes sunken dull, sticky body openings, increased breathing Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive including)	2. General condition					
more visible breathing Eyes sunken dull, sticky body openings, increased breathing Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive itching)	Shiny eyes, body openings and skin clean	0				
Abnormal posture, the animal feels cold, a gyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness and handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive atticking)	Cloudy eyes, increased muscle tone, more visible breathing	1				
eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea 3. Spontaneous behavior Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive itching)	Eyes sunken dull, sticky body openings, increased breathing	2				
Attentive, curious, straightening, quick movements Decreased reactions, movement reduced, restricted or excessive activity Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness and the handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive activity)	Abnormal posture, the animal feels cold, eyes closed, cramps, paralysis, breath sounds, bluish mucous membranes, diarrhea	3				
Decreased reactions, movement 1 reduced, restricted or excessive activity 2 Partial separation from the group, 2 movement reduced, pain when walking 3 Apathetic, no reaction or aggressiveness 3 In handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria 5 Self-injury (e.g. in case of excessive 3 Inchange) 3 Inchange 1 Inchange 2 Inchange 2 Inchange 3 Inch	3. Spontaneous behavior					
Partial separation from the group, movement reduced, pain when walking Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive in the content of the c	Attentive, curious, straightening, quick movements	0				
Apathetic, no reaction or aggressiveness an handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive attching)	Decreased reactions, movement reduced, restricted or excessive activity	1				
in handling, severely restricted movement, isolation, drags forward. 5. Other termination criteria Self-injury (e.g. in case of excessive atching)	Partial separation from the group, movement reduced, pain when walking	2				
Self-injury (e.g. in case of excessive 3 tching)	Apathetic, no reaction or aggressiveness in handling, severely restricted movement, isolation, drags forward.	3				
tching)	5. Other termination criteria					
Total score	Self-injury (e.g. in case of excessive itching)	3
